Greetings

Welcoming Message from Nippon Finance Association

Tomio Arai

President 2006-2007, the Nippon Finance Association

(Professor of Finance, University of Tokyo)

Welcome to Yokohama and to the Asian FA-NFA 2008 International Conference. On behalf of the Nippon Finance Association, I would like to take this opportunity to welcome all international participants and guest of honor to Yokohama, one of the most cosmopolitan cities in Japan.

The Nippon Finance Association and then the Asian-Pacific Finance Association (now the Asian Finance Association) jointly held the first international conference in 1998 in Tokyo. Since then two associations have kept a close relationship, and co-founded *the International Review of Finance*. We at the Nippon Finance Association are very pleased to have the second international conference held in Japan after a lapse of ten years.

The conference theme of this year “*The Mission of Financial Studies in the Globalized Economy*” which was determined two years ago turned out to be very timely today. The subprime mortgage crisis since the summer of last year re-confirmed the strong linkage among the financial markets in the world. The seemingly unrelated turmoil in the subprime mortgage market in the United States has kept shaking the Asian stock markets. This incident of the subprime crisis opens the box of new research themes of financial studies for coming years.

I would like to express our sincere appreciation to the sponsors who donated money even under such a tough financial conditions in order to make this international conference possible. I also thank those involved for the preparation of this conference especially organizing committee for making great efforts to make this conference a great success.

I hope every participant has fruitful exchange of ideas and strengthen networking during this conference, and do not forget to take some time to enjoy a cosmopolitan flavor of the city of Yokohama.

Thank you.

Greetings

President's Message

Takao Kobayashi

President of the Asian Finance Association, 2007-08

The University of Tokyo

Year 2008 marks the twentieth year of the founding of the Asia Pacific Finance Association and the Pacific Basin Financial Management Association, which amalgamated into the Asian Finance Association, the AsianFA. The objective was to pool resources together to provide a professional society for academics and practitioners with an interest in financial theory and its application. It also aims to promote financial research by serving as a focal point of communication for scholars residing in Asia-Pacific region and abroad.

AsianFA has had the co-operation and good wishes of several national finance associations in holding annual conferences in different cities in the vast Asia-Pacific region. This year's joint host, Nippon Finance Association, the NFA, has a long-standing fraternal relationship with the AsianFA. The emblem of this collaboration is the publication of both associations' official journal, the *International Review of Finance*, initially edited by Sheridan Titman and then Bruce Grundy with the editorial assistance offered by K.C. Chan, Nai-fu Chen, Neal Stoughton, and myself. The two organizations have a strong will to bring this journal among the top finance journals in the world as does the European Finance Association for the *European Finance Review*, now named the *Review of Finance*.

An invaluable help in our effort to build our reputation for quality came from the Financial Management Association International Inc., the FMA. FMA has held 11 meetings on a joint basis with us over the years. This year FMA holds FMA-NFA doctoral symposium on 6th July, thus continuing the many years of cooperation with us in this region.

We have also been very well supported by stock exchanges, securities commissions and the leading financial institutions in many countries. Their generous sponsorships secured the services of leading lights in Finance to grace the conferences. Those included several Nobel laureates: Merton Miller, James Mirrlees, Franco Modigliani, Robert Mundell, Myron Scholes, and William Sharpe. Other scholars played significant roles in keynotes. This year we continue this practice and will have the pleasure of listening to keynote speeches by Eduardo Schwartz and Kenneth Singleton; invited speeches by Jerome Detemple, Roger Ibbotson, Michael Lemmon, Sheridan Titman, Jiang Wang, Kurt Winkelmann, and Guofu Zhou. I also appreciate the joint effort of the University of Tokyo's Center for Advanced Research in Finance (the CARF) and FMA's former president, Ralph Walkling, to organize the panel: "Corporate Governance around the World".

I must also record the valuable services rendered by a group of scholars who took leadership over AsianFA's 20-year history. Two of the long-serving members will leave the organization this year: Frank Finn, a past president, who also served as the chair of Elections Committee until 2006, has retired from the University of Queensland. Mohamed Ariff, after having served in many capacities, will leave in 2009 after his last two years as outgoing president. To them and to the 15 founding members, may I ask you to be mindful of their dedicated services.

This meeting records Nippon Finance Association's second joint international conference with Asian Finance Association, the first one being in 1998. As usual the hard work of reviewing papers submitted to the conference was managed by Kalok Chan and Vidhan Goyal with the extremely reliable help of Hitoshi Takehara and the International Review Panel. They managed the task of blind review process of some 570 papers and of structuring the whole program that you will witness during the four days. Also, the Program Committee deserves to be highlighted for managing the entire conference. I would like to single out its chairman, Kazuhiko Ohashi, and NFA's president, Tomio Arai, for their great effort in making it possible to have this year's international conference held in the beautiful but expensive city of Yokohama.

FMA:

The Financial Management Association International (FMA) was established in 1970 and has become the global leader in developing and disseminating knowledge about financial decision making. The mission of the FMA is to broaden the common interests between academicians and practitioners, provide opportunities for professional interaction between and among academicians, practitioners and students, promote the development and understanding of basic and applied research and of sound financial practices, and to enhance the quality of education in finance. FMA's members include academicians and practitioners across the world. A non-profit organization, FMA publishes research and commentary on important financial issues; hosts annual finance conferences at which advances in theoretical and empirical research come together with the current issues and concerns of practicing finance professionals are taught, critiqued, and discussed; and brings together the professionals who share a common interest in finance. FMA also maintains one of the largest clearinghouses of doctorally-qualified positions and candidates in the finance community for its members and has student chapters throughout the United States, Canada, Mexico, Europe and Australia.

CARF:

The Center for Advanced Research in Finance (CARF) was established at the University of Tokyo in April 2005 and aims to play a central role in financial research in the Asia Pacific region. Our mission is to contribute to the sound development of the economies of Asia and the world through the promotion of theoretical and practical financial research. In order to achieve this objective, CARF endeavors to be an open international research center that is accessible to society.

Asia is currently undergoing a momentous transformation that has demonstrated the rising importance of the economies and enterprises of Asia to the world economy. As Japan continues to grasp for an appropriate role in the 21st century, it must foster an affluent and esteemed socio-economy without ceasing efforts at renewal. The financial and capital markets of Tokyo must perform a positive role in this process. In order to sufficiently function as a financial center that supplies the development funds to the economies and industries of the Asian region, which have already achieved a high level of growth, the Tokyo market must be an efficient and innovative one. Using financial theory to suggest design and policy for such a financial system and to develop techniques for innovative investment, CARF places importance on the themes of procurements and risk management. Another important role of the Center is to conduct multifaceted research -- both micro and macro; theoretical and empirical -- on the various aspects of the successes and failures of the Japanese financial system's past model in order to promote balanced future growth of Asian economies.
